Hospital Wound Management - Product Vision

The Hospital Wound Management Project will enable a much more convenient management of patients' wounds. Tablets running on multiple platforms (iOS, Android, Windows phone) will give an overview of a patient's wounds including wound histories. This simplifies treatment and (medical) care of the wounds and prevents errors.

#	Rel.	Size	Category	Short Name	Item Description	Acceptance Criteria
1		5		Toolchain Vaadin	As a developer, i want a working Toolchain to compile a Vaadin project	Toolchain which compiles a simple „Hello World“ for Vaadin.
2		5		Toolchain mGWT	As a developer, i want a working Toolchain to compile a mGWT project	Toolchain which compiles a simple „Hello World“ for mGWT.
3		1		Doku Toolchain Vaadin	As a developer, i want a documentation about how to set up a Vaadin Toolchain	Step-by-Step documentation on how to set up a Vaadin Toolchain
4		1		Doku Toolchain mGWT	As a developer, i want a documentation about how to set up a mGWT Toolchain	Step-by-Step documentation on how to set up a mGWT Toolchain
5		3	Research	DB-Backend Compatibility	As a developer, i want to know which DB-Backends are compatible with our toolkits.	List of compatible Databases
6		3	Research	PhoneGap Build - Process Comparison	As a developer, i want to know, whether it is possible to use the PhoneGap Build process with our frameworks.	Document, why it is not possible to integrate the PhoneGap Build/ how to integrate/costs.
7		3	Research	GUI Contents	As a developer, i want to know how much functionality the GUIs of our frameworks have in comparison.	Document with a general comparison.
8		3	Research	GUI native feeling	As a developer i want to know how native the toolkits' GUIs feel on the devices.	collect some studies concerning native gui feeling with the frameworks + give overview over them
9		3	Research	Offline-Capabilities	As a developer/product owner/industry partner, i want to know how much offline capabilities the toolkits have.	overwiev concerning the offline capabilities
