Vaadin Touchkit Toolchain - Windows 7

1. Download Java SE Development Kit 8.

http://www.oracle.com/technetwork/java/javase/downloads/jdk8-downloads-2133151.html Install.

2. Download Eclipse IDE for Java EE Developers (Kepler SR2).

https://www.eclipse.org/downloads/packages/eclipse-ide-java-ee-developers/keplersr2 Unzip.

3. (This step is not necessarily needed for the use of Vaadin, but might be helpful during our project.)

Install EGit (Git Plugin for Eclipse):

In Eclipse, click Help > Install New Software...

Select the EGit update site http://download.eclipse.org/egit/updates

Select all, click Next and follow the instructions of the installer.

You will need to restart Eclipse.

4. Download Apache Maven 3.2.1.

http://maven.apache.org/download.cgi

Unzip.

Open System Properties (WinKey + Pause), select *Advanced* tab, click *Environment Variables* button.

To system variables add

a. JAVA_HOME

path of your JDK, e.g. C:\Program Files\Java\jdk1.8.0 05

b. Path (prepend the value)

%JAVA HOME%/bin

To user variables add

c. M2_HOME

path of your unzipped Maven archive, ending with '...\apache-maven-3.2.1'

d. M2

%M2 HOME%\bin

e. Path (if already existing in user variables, prepend the value) %M2%

f. Optional:

MAVEN_OPTS

specify JVM properties, e.g. -Xms256m - Xmx512m.

Open new command prompt (WinKey + R, type *cmd*), run *mvn --version* to verify that it is correctly installed.

5. (This step is not necessarily needed for the use of Vaadin, but might be helpful during our project.)

Install m2eclipse (Maven Plugin for Eclipse):

In Eclipse, click Help > Install New Software...

Select the m2e update site http://download.eclipse.org/technology/m2e/releases

Select *Maven Integration for Eclipse*, click *Next* and follow the instructions of the installer. You will need to restart Eclipse.

6. Install Vaadin Plugin for Eclipse.

In Eclipse, click Help > Install New Software...

Select the Vaadin update site http://vaadin.com/eclipse

Select Vaadin Plugin for Eclipse, click Next and follow the instructions of the installer.

You will need to restart Eclipse.

Download Vaadin Touchkit.

https://vaadin.com/directory#addon/vaadin-touchkit

Click Download Now, select AGPL license.

Unzip.

Additional information:

- You can include the Vaadin Touchkit via Maven into a project by adding this dependency to the pom.xml:

```
<dependency>
    <groupId>com.vaadin.addon</groupId>
    <artifactId>vaadin-touchkit-agpl</artifactId>
    <version>4.0.0.alpha2</version>
</dependency>
```

 To create an example of a Vaadin Touchkit Project with Maven, open command prompt, go to workspace folder and run

- You can import this project into Eclipse using File > Import, Existing Maven Projects.
- See also: https://vaadin.com/wiki/-/wiki/Main/Creating+a+Maven+project
- I personally had problems with Internet Explorer, Firefox and Opera:
 Failed to load the widgetset:
 ./VAADIN/widgetsets/com.vaadin.DefaultWidgetSet/com.vaadin.DefaultWidgetSet.nocache.js
 Chrome works just fine.
